

Professor José Ignacio Rodríguez PhD.
Engineering Faculty Dean.
Universidad Distrital Francisco José de Caldas.
Bogotá D.C. – Colombia.

7 March, 2025

Engineering Faculty Dean

Dear Dean,

Greetings from Regional Centre for Space Science and Technology Education in Asia and the Pacific (China)
(Affiliated to the United Nations).

According with the visit of professor Leonardo Plazas Nossa at Hangzhou campus of Beihang University from 24 February to 7 March 2025. We confirm the academic meeting to exchange the micro-satellite technology related topics.

The micro-satellite technology topics were:

1. Micro-Satellite key technologies - Theoretical study. - Design Concepts. - Simulation. - Hardware model (Device) test. - Spacecraft Attitude Control. - Platform: OBDH, ADCS, EPS, TT&C and TCS. - Type of Payloads (Missions). - In-orbit operation and test.	2- Space Technology Concepts - Concept of Aeronautics. - Concept of Astronautics. - Classifications/kinds of Flight Vehicles. - The development of space technology.
---	--

During the period, we accompanied Professor Plazas to visit the other two Beihang University campus including the aerospace education related facilities in Beijing city, and AIT laboratories of MinoSpace company located in Beijing, meanwhile we also accompanied him to visit the laboratories of Star-Vision company in Hangzhou city.

With kind regards,

Prof. Dr. JING Guifei
Deputy Director, RCSSTEAP (China)

Prof. Dr. HUANG Hai
Chief Expert, RCSSTEAP (China)

166, Shuanghongqiao Street, Pingyao, Yuhang, Hangzhou, China.

HANGZHOU INTERNATIONAL INNOVATION INSTITUTE OF BEIHANG UNIVERSITY

报告题目：哥伦比亚Cubesat-UD项目

Title: Colombian Cubesat-UD Project

时间：2025年3月7日周五上午9:00-11:00

地点：会议中心2003/2004

Date: March 7, 2025 (Friday) 9:00-11:00

Location: Conference Center 2003/2004

主讲人 Speaker

Leonardo Plazas-Nossa

Leonardo Plazas-Nossa教授，任职于Francisco José de Caldas Distrital 大学，电子工程师，信息科学与电信学硕士，工程学博士。在电信领域有30年的相关经验，担任大学教授22年。所教授的本科课程包括电信与数据网络，研究生课程包括通信与移动通信。

Professor Leonardo Plazas-Nossa, Full Professor at Francisco José de Caldas Distrital University, Electronic Engineer, MSc. Information Science and Telecommunications. PhD. in Engineering, 30 years on Telecommunications topics and 22 years as University Professor. Undergraduate courses as Telecommunications and Data Networks, Postgraduate courses as Communications and Mobile Telecommunications.

内容概要 Abstract

CUBESAT-UD Colombia-1 远程医疗与遥测项目由Francisco José de Caldas Distrital大学提出，主要目标是设计开发一个用于小型卫星研制的学术培训项目。微纳卫星用于运行的必要模块包括：结构与机械系统、电源系统、通信系统、指令与数据管理系统、姿态确定与控制系统、任务载荷系统以及地面站。该项目当前在部分子系统模块上已取得一些独立成果。未来发展方向包括采用基于 Linux 操作系统的微控制器或微处理器升级主板，推进获取合适VHF、UHF 频段的相关流程等。

The CUBESAT-UD Colombia-1 Telemedicine and Telemetry Project is proposed by Francisco José de Caldas Distrital University, main objective: designing and developing an academic training program in the development of small satellites. The modules necessary for the nano-satellite implementation are: Structures and Mechanisms Subsystem, Power Subsystem, Communications Subsystem, Command and Data Management Subsystem, Attitude Determination and Control Subsystem, Mission Payload Subsystem and Ground Station Subsystem. The project has some independent results in some Subsystem modules. Future elements, upgrade main board using microcontroller or microprocessor with Linux-OS and process to obtain the proper VHF and UHF frequencies.
